Instant Cooling, No Waiting. The New **ONIDA 2010 Range** of Air Conditioners is designed to provide Instant Cooling in peak summer when it is needed the most. Onida ACs have high energy efficiency and heavy duty cooling due to its advanced design of large multi bend cooling coils, highly efficient compressors and high air throw. Only ONIDA ACs have unique and advanced features like i-cool, Actual Savings Meter, One Touch AC & Fan Auto control, Large Display and Biosleep with 3 stage control.

Exclusive Features:

i-COOL : 5 Speed Instant Cooling

Innovative feature gives Instant Cooling at **ONE TOUCH** of remote .The AC has advanced auto climate control technology which controls both Air Conditioner and Ceiling fan.

In **i-cool** mode the AC & Ceiling Fan start at 5th speed which is available only in ONIDA i-cool range of ACs and is designed to give instant cooling and comfort with high air throw of cool air. Compressor will start immediately in this mode.As the temperature drops the AC and Ceiling Fan are preprogrammed to change the cooling speed and give powerful cooling along with energy savings. During this operation both AC and Ceiling Fan are coordinated to ensure speed cooling with high energy savings.

Actual Savings Meter:

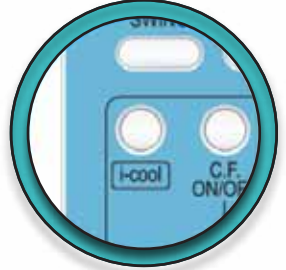

Unique actual savings meter measures the real time energy savings and displays the savings in Rupees compared to normal non star AC .This revolutionary feature gives the proof of actual savings based on individual usage pattern.

One Touch Control:

Easy to operate ONIDA ACs can be started with press of just one key on remote. User friendly remote control ensure that with one touch the AC starts in i-cool mode . In this mode both AC & ceiling fan (in case optional controller is installed) work in tandem to provide cooling comfort.

3 Stage Biosleep: With 4 Personal preferences

3-Stage Biosleep

This is designed for complete sleep comfort taking into consideration the human sleep cycle. AC controls the room temperature through the 3 modes of sleep -Early sleep , Deep Sleep and Wake Up .This features comes with 4 personal preference depending on individual sleep cycle .

Energy Saver Mode:

Pressing Energy Saver key on remote activates Energy Saver function to keep room normal temperature by reducing compressor run hours to get more savings. In this mode the AC works on a preset temperature of 25°C at selectable fan speed. Compressor will work in cyclical ON/OFF mode to keep the room temperature within 2° of set temperature.
